

**Ensure
accurate
pricing control
and stock
management with
Single Scan
Barcode**

We firmly believe that software should work for the user to make processes easier and more efficient. Our Single Scan Barcode update does just that, and your retail teams will love it.

Single Scan Barcode (SSB) enables more control when processing gift aid and management information on donated and non-donated sales. This means better accuracy with pricing and improved stock management.

Shop teams have a tough enough job, that's why we believe EPOS systems should make life easier. Our SSB update enables tighter pricing processing for donated goods and a faster transaction time at the till. SSB not only speeds up the process for customers in your stores but also improves efficiencies with easy to use department tabs which allow your shops to amend pricing and rotate stock seamlessly.

So, what is in it for you and your charity?

By improving the management sales information your shops can improve their space utilisation which will lead to increased sales and Gift Aid contributions. By improving control over pricing your shops will protect their margins and price donations to match or beat direct competition.

Our analytics allow an overview of customer behaviour, letting you know what is being purchased and allowing you to control stock levels centrally. Make sure your shops have what they need, when they need it.

We know customers have less time than ever before, so we have made the selling process so quick that they have more time to browse. Our simple to use, single scan also reduces training time for your team members.

Our CHARiot software continues to develop in line with your business and customer needs. We pride ourselves on being at the forefront of these developments and a driving force of change in our industry.

Key Features

- Making it easier to sell, reducing team training requirements
- Gives you better control over stock and pricing
- Better analytics so you know what your customers want
- Maximise revenues for your charity with better control over margins
- Improves shop efficiency without increasing workload of your team
