

Increase  
efficiency and  
cut queues with  
our QBuster app

**CHARiot customers can benefit from our QBuster app for tablets - a secure and easy-to-use platform that helps staff and volunteers ensure maximum capture of donors' goods as well as increase Gift Aid contributions.**

QBuster can be used anywhere in the shop. It can replace standard donor forms, register donor signatures, generate reports and provide bag drop processing functionality.

Introducing QBuster into your store will mean donors and shoppers no longer need to wait in the same queue. This will not only improve efficiency, but offer a unique shopping experience with an increased level of customer service.

## “Here are my bags – I can’t wait any longer!”

Q Buster was developed in collaboration with our clients in order to reduce queues at till points, increase in-store efficiencies and boost revenue.

With integrated postcode lookup, the app enables staff and volunteers to register new donors anywhere in-store taking the pressure away from the till point. It boasts a digital donor form which includes the Gift Aid declaration and Agency Agreement, featuring the required tick box and a functional signature panel.

The recorded data is automatically transmitted to the till using industry standard encryption to ensure security.

Q Buster also processes donations from existing customers; it allows you to update donor details or retrieve a suspended donor declaration on the go.

CHARiot is the first HMRC recognised solution for processing Gift Aid on Rags and we've included this functionality within the app to allow you to process rag items at all times regardless of till or back office availability.
