

**CHARiot Lottery
is a winner**

An innovative addition to our CHARiot EPOS system, our Lottery Module enables charities with in-house lotteries to integrate this growing source of fundraising with retail operations in a single interface.

The CHARiot Lottery equips staff and volunteers with the functionality to sell lottery tickets in-store as part of a retail transaction with minimal key strokes.

CHARiot's Lottery Module has been developed to maximise revenue from lottery sales, through a streamlined system that is easy to integrate with the existing software, and simple to use by charity staff and volunteers.

The functionality automatically links the lottery sale with back office systems for quicker and easier reporting.

How the CHARiot Lottery Module works:

- Check age – CHARiot will request you check the customer's age prior to selling a ticket, ensuring you stay within the law
- Pick type of play – customers can select to play a single time or multi-play over future draws
- Take details – input the customer's details quickly using a postcode lookup
- Print lottery tickets – the lottery tickets and numbers are printed on the normal receipt
- Select winner from external system – lottery ticket information links to numerous lottery systems, where the draw will take place
- Notify winner – once the draw has taken place, you can then notify your customer that they have won

"The Lottery Module is fantastic – it's extremely easy to use and caused no disruption to our current system when it was updated. As another source of revenue generation, the return on investment is set to be substantial."

Edd Smith, Corporate Fundraiser and Lottery Manager, St Peter's Hospice

Key Features

- Easily integrated with the CHARiot solution
- Seamless link with external lottery systems
- Full lottery sales reporting, including lottery sales through CHARiot's dashboard
- Single play and multi-play for future draws
- Maximise lottery sales by selling tickets up to automated cut-off time
- Speed up process of lottery sales
- Easy to use for staff and volunteers
- Not internet-reliant
- Select which stores sell lottery
